## Download Free Fedora User Manual

From Dominig, I keep a precompiled version of OpenCPN for OpenSUSE and Fedora ready to install in the OpenSUSE build system (OBS). As both distro are rpm based, it's very easy for me to suport both. Getting the correct wx release built and installed is a pain as notonly you need to get the right version built, but you also need to compile it with the right option set (no stl) and then make ...

### **Fedora [OpenCPN Manuals]**

man shows the system's manual pages. This is the command we use to view the help document (manual page) for any command. The man pages are organized based on sections, and if the same command is found in many different sections, only the first one is shown. The general syntax is man section command.
