Profile Those who are interested in a fellowship in paediatric anaesthesia are encouraged to apply, especially when interested in combining this programme with training in chronic pain.

Vacancy - Fellow Paediatric Anaesthesia - Radboudumc

Abstract. Background: Preoperative fasting is a major cause of perioperative discomfort in paediatric anaesthesia and leads to postoperative insulin resistance, thus potentially enhancing the inflammatory response to surgery. Addressing these problems by preoperative carbohydrate intake has not been a well-defined approach in children.
