The definition provided by the American Nurses Association (ANA) and recommended by HIMSS has become widely referenced in response to the question, "What is nursing informatics?" Nursing informatics "is the specialty that integrates nursing science with multiple information and analytical sciences to identify, define, manage and communicate data, information, knowledge and wisdom in nursing practice."

What is Nursing Informatics? - HIMSS

Informatics and computation for every IC's mission. Informatics and computation should not be championed by just a few ICs, based on the personal vision of particular leaders. Instead, NIH leadership must accept a distributed commitment to the use of advanced computation and informatics toward supporting the research portfolio of every IC.

Data and Informatics Implementation

Informatics provides a tremendous opportunity to advance nursing science. The initial boom in EHR implementation is winding down in acute care, but design and implementation responsibilities continue to grow, as does healthcare technology innovation. (See Where can you work?)
