Able to select graph most appropriate to display a collection of data or to illustrate a conclusion. Able to interpret a graph, table, or chart and analyze the data display to reveal a concept. Able to predict (extrapolate and interpolate) from a data display. Graphing Skills 1

Charts and Graphs - Mr. Stewart's Physical Science

Finally, I reveal that the answers are graph B for position over time and graph F for velocity over time. I won't elaborate much on why those are the answers since I want students to investigate and explore "the why" during the next activity. I do, however, ask students to raise their hand if they got at least one of the graphs correct.

Moving Man Simulation Activity Answer Key - BetterLesson

Using Graphing Skills Introduction Recorded data can be plotted on a graph. A graph is a pictorial representation of information recorded in a data table. It is used to show a relationship between two or more different factors. Two common types of graphs are line graphs and bar graphs.
